### DETAILED ACTION

1. Claims 24-25, 27-29, 32-37, 39-47, 52-55, 57, 60-66, 68-76, 78-82, 84-87 and newly submitted claims 126-133, 135-141, 152-161 and 167-172 are rejected under 35 USC 102(e) as being anticipated by Gelsinger for reasons of record in paper no. 9, paragraph 4, mailed on December 19, 2001.
2. Claims 24-29, 32-37, 39-47, 52-53, 55, 57, 60-66, 68-87, and newly submitted claims 126-133, 135-141, 152-161 and 167-172 are rejected under 35 USC 102(b) as being anticipated by Chigot for reasons of record in paper no. 9, paragraph 6.
3. Claims 24-29, 32-37, 39-47, 52-53, 55, 57- 60-66, 68-87 and newly submitted claims 126-133, 135, -141 and 152-173 are rejected under 35 USC 103(a) as being unpatentable over ~~Chigot~~  
Gligot for reasons of record in paper no. 9, paragraph 8.
4. Applicant's arguments filed December 13, 2001 and February 28, 2002 have been fully considered but they are not persuasive. Applicant argues that Gelsinger fails to teach the features of claim 24 that "the liner strip being in a configuration to provide, when removed and separated from the liner body portion, the liner can be manipulated". This is not found to be persuasive because said phrase is directed to an intended future use of the claimed product and is not a positive limitation..

Similarity, claims 44 and 66 are also found to be anticipated by Gelsinger as explained above.

Art Unit: 1772

Contrary to applicants assertion that Gelsinger fails to disclose any liner strip or at least one weakened separation line to define... plurality of aligned face stock labels. This is not deemed to be convincing because Gelsinger does teach a plurality of labels (figure-4) with "at least one facestock separation line" as claimed.

For claim 70, Gelsinger clearly shows (fig-4) that each liner strip is die-cut and separate from the other and adhesive holds the liner strips together as in claim 71. For claim 75, Gelsinger shows the cut portion of the line sheet in figure 2.

As for the design choice provision of a second handle, it is respectfully pointed out to the applicant that if Chigot had expressly suggested for the configuration with said second handle, then Chigot would have anticipated the invention s claimed.

Thus, in the absence of any evidence to the contrary, it remains the Examiner's position that instant claimed invention is anticipated or rendered obvious over the applied prior art of record as discussed above.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 140 contains the trademark/trade name Mylar. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark

Art Unit: 1772

or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe polyethylene terephthalate and, accordingly, the identification/description is indefinite.

7. Claims 56, 134, 142-149 and 150 are free of the prior art uncovered so far for reasons discussed in paper no. 9, paragraph 9.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 308-4424. The examiner can normally be reached on Monday-Thursday from 7:30am to 5:00pm. The examiner can also be reached on alternate .
